there's no sniper btw. Amazing story. Thrilling throughout. 10/10 guaranteed to have a great fun while a game from the masterpiece bundle. I feel proud to own this intense action game.. Gangsta Sniper > Sniper Elite 4. Got this for \$0.55 cents, and still going to request a refund.

Right off the bat, the interface looks like early access, when loading a level, the game will freeze for a couple seconds and then load. First time it happened, I pressed ESC and guess what, it sent me back to the menu with no warning, making me have to back to the load screen :)

The graphics are basic Unreal Engine 4, so of course it will look somewhat pretty when used in it's basic settings. The gameplay could have been a fun, sandbox type of game, but the main objective is to collect moneybags in this HUGE open-world... except that open world is emptier than middle-tier iPhone games.

As people have said, no sniping and it's called Gangsta Sniper. Suck it.

EDIT: I had to let the game run for another 2 minutes to allow me to post my review. Dear Steam, if people are posting negative reviews when they haven't played even 5 minutes of it, they're either trolling or the game is bad. Steam is dead.
